CLOUD SUPPORT & DEVOPS | KUBERNETES | GITOPS | INFRASTRUCTURE AUTOMATION

PROFESSIONAL SUMMARY

OCI-certified Computer Engineering graduate with hands-on experience building production-oriented Kubernetes and Azure cloud projects, plus six months of enterprise SaaS technical support. Skilled in infrastructure as code, CI/CD, GitOps, observability, cloud networking, Linux, and technical troubleshooting. Ready to contribute in a Cloud Support or DevOps role.

TECHNICAL SKILLS

Cloud & Infrastructure: OCI; AWS (EC2, VPC, security groups, subnets, routing); Azure Functions; Cosmos DB; Terraform; VMware vSphere; Proxmox

Containers & Delivery: Kubernetes (k3s), Docker, Helm, Argo CD, GitHub Actions, Git, YAML, OIDC

Observability: Prometheus, Grafana, Azure Application Insights, Log Analytics

Systems & Networking: Linux (Ubuntu), Windows Server, Active Directory, TCP/IP, DNS, VPN, SSH, RDP

Development & Automation: Python, Bash, PowerShell, React, TypeScript, Vite, Jira, technical documentation

Security: Endpoint Security, Trend Vision One Server and Workload Protection

PROJECTS

Cloud-Backed Portfolio | End-to-End Cloud and DevOps Project

- Built a production-oriented portfolio using React, TypeScript, Vite, and GitHub Pages with Python Azure Functions APIs and Azure Cosmos DB persistence.
- Provisioned Azure resources with Terraform and implemented GitHub Actions CI/CD using OIDC authentication to Azure, production-readiness checks, path-specific deployments, and smoke verification.
- Implemented Application Insights and Log Analytics observability, health and visitor APIs, automated testing, security checks, and a provider-neutral AI portfolio assistant.

Production-Style Kubernetes Home Lab | Self-Directed Infrastructure Project

- Architected and deployed a multi-node k3s cluster across Raspberry Pi 4 and repurposed x86 hardware running Proxmox, supporting containerized workloads and automated DNS management.
- Established GitOps delivery with Argo CD and declarative manifests in Git, including automated synchronization policies.
- Implemented Prometheus and Grafana observability and maintained the environment end to end, from provisioning and deployment to monitoring and troubleshooting.

PROFESSIONAL EXPERIENCE

Technical Support Engineer, Endpoint Security SaaS

TrendAI | Pasig City | Aug 2025 - Feb 2026

- Resolved 80+ enterprise technical cases involving endpoint deployment, policy configuration, connectivity, networking, systems, and cloud infrastructure while meeting SLA requirements.
- Troubleshooted hybrid Windows/Linux environments using Trend Vision One Server and Workload Protection for global SMB clients.
- Provisioned AWS environments using EC2, VPCs, security groups, subnets, and routing to reproduce customer configurations and validate reported issues.
- Completed 640 hours of new-engineer training across enterprise networking, server administration, VMware vSphere, Azure, and AWS fundamentals; produced precise customer-facing resolutions as official case documentation.

IT Helpdesk Intern

Philippine Transmarine Carriers | Makati City | Mar 2025 - May 2025

Tasks performed under the supervision of senior IT staff

- Supported Active Directory account administration and troubleshooting for network connectivity and VPN access.
- Securely reformatted and redeployed Windows workstations in line with data privacy and asset-management procedures.
- Tracked IT assets in Excel and assisted with RAM and SSD upgrades that extended equipment service life.

EDUCATION

Bachelor of Science in Computer Engineering

National University Baliwag | Baliwag, Bulacan | Aug 2021 - Aug 2025

Thesis: IoT Integrated Consultation System for Enhanced Student-Faculty Interaction

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Foundations Associate
- Trend Vision One Server and Workload Protection Professional
- GitHub Foundations
